The Next

Cruiser

Introduction / LC FJ

Freedom & Joy

Returning to the origins of the Land Cruiser, the goal was to deliver "TRUST" to customers around the world.

The Land Cruiser FJ pairs authentic Land Cruiser off-road capability with the Freedom to go anywhere and the Joy to enjoy every journey.

Introduction / LC FJ

Born From The King Of The SUV Heritage, Built With Agility For The City And Beyond.

A commanding Land Cruiser heritage design,
combined with a tight, athletic form, conveys
the Land Cruiser FJ's high level of performance.

Introduction / LC FJ

Challenge Any Road With Trust.

With reliability born from high quality, it challenges any terrain with confidence, while its wide stance and flexible performance expand the possibilities for adventure.

LC FJ / Design

Generous windows ensure a wide, open view, while clearly organized instruments enable intuitive and effortless operation.

Air conditioning

12.3-inch Display Audio

USB port (charging)

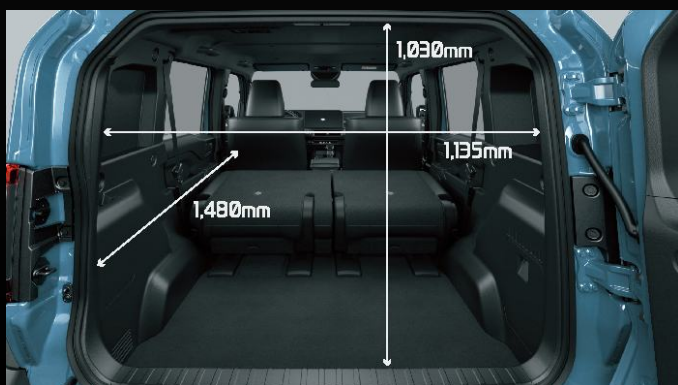

7.0-inch TFT liquid crystal meter

LC FJ / Design

A spacious front seating area and flexible rear-seat versatility expand the possibilities for every journey.

Luggage space

40° Rear seat reclining

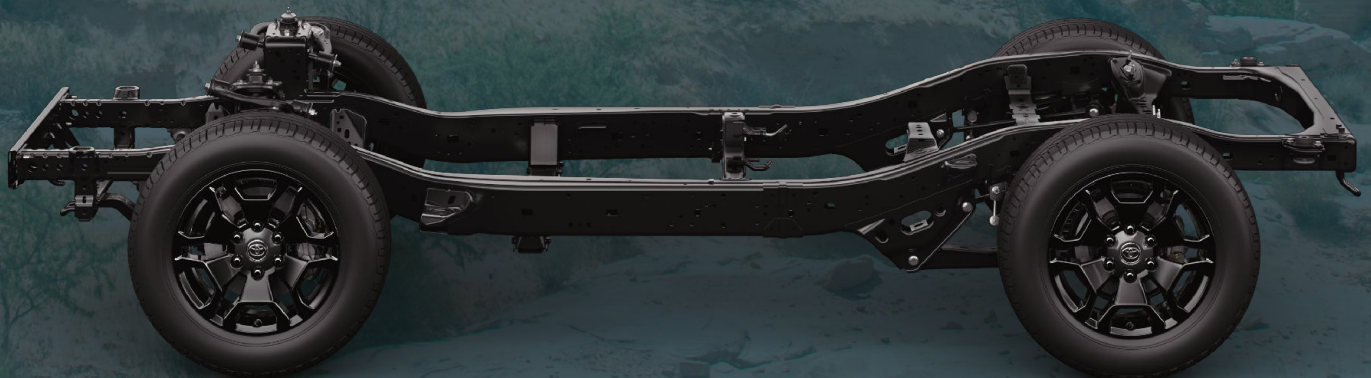

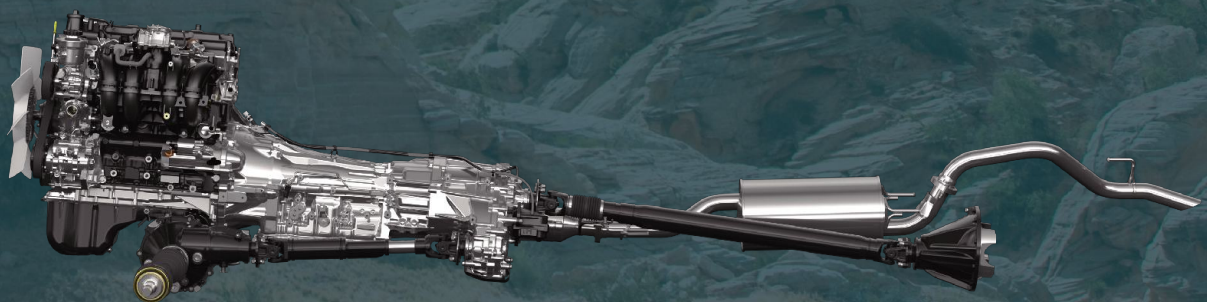

Side-opening back door

Foldable rear seat

LC FJ / **Frame**

A frame inheriting the legacy of the toughest body-on-frame vehicles, delivering confidence across any driving conditions.

LC FJ / Performance

Part-time 4WD System

The part-time 4WD system normally operates in 2WD for efficient on-road driving, and allows the driver to engage 4WD when additional traction is needed on rough or slippery surfaces.

DAC

The Downhill Assist Control (DAC) system helps prevent excessive speed on steep downhill slopes by automatically controlling the brakes to maintain a low, constant speed.

2nd Gear Start

Starts the vehicle in 2nd gear instead of 1st to reduce wheel spin and provide smoother, more controlled acceleration on slippery or low-traction surfaces such as snow, mud, or wet roads.

Inclinometer

The inclinometer shows the vehicle's pitch and roll angles on the instrument display so drivers can understand vehicle tilt when driving off-road.

Rear Differential Lock

The rear differential lock mechanically locks the rear differential so that both rear wheels rotate at the same speed, helping the vehicle maintain traction when one wheel loses grip.

6-speed Super ECT

The 6-speed Super ECT (Electronically Controlled Transmission) is a super-intelligent automatic transmission that delivers smooth shifting while balancing strong driving performance and fuel efficiency.

Departure Angle

Safety technologies for your journey.

Pre-Collision System (PCS)

The Pre-Collision System detects vehicles, pedestrians, and motorcyclists, providing warnings and automatic braking to help prevent or mitigate collisions.

Parking Support Brake (PKSB)

The Parking Support Brake helps protect both vehicle and passengers by alerting the driver and automatically braking at low speeds to avoid or reduce collisions.

Blind Spot Monitor (BSM)

The Blind Spot Monitor uses millimeter-wave radar to detect vehicles in rear side areas that are hard to see with the mirrors. An indicator on the side mirror illuminates when a vehicle is approaching.

Adaptive Cruise Control (ACC)

Lane Departure Alert (LDA)

Adaptive high-beam system (AHS)

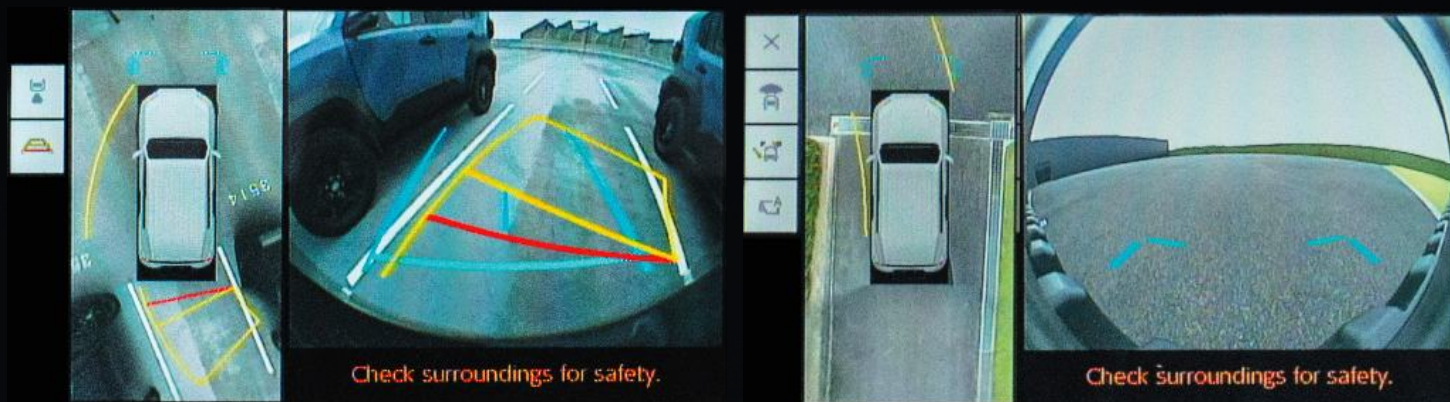

Drive Start Control (DSC)

LC FJ / Safety Features

Panoramic View Monitor

Panoramic view monitor assists the driver in viewing the surroundings, when operating at low speeds, by combining the front, side and rear cameras and displaying a complete vehicle overhead image on the screen.

SRS Airbags

The SRS airbag system works with the seat belts to help protect occupants, with front, side, and curtain-shield airbags positioned throughout the cabin.
